WE ARE TUTUTIS

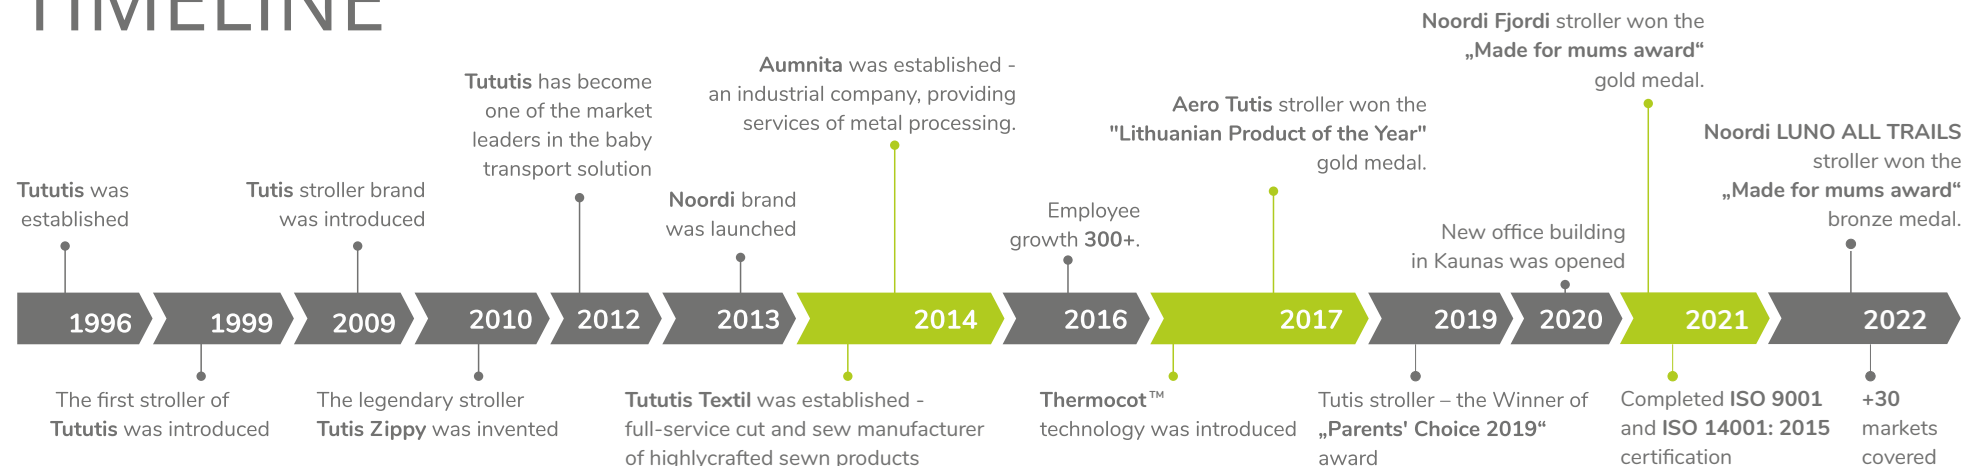

Once started as a small family business, we grew to be one of the leading baby stroller developers and manufacturers in Northern Europe. We are proud to have more than **26 years of experience**, refined traditions, and impeccable quality standards. Our success is determined by the creative application of cutting-edge technology, technical solutions, modern design, and talented people who seek for innovation.

TUTUTIS MISSION

Our mission is to create innovative baby transport solutions, enjoyable for parents and safe for babies.

CERTIFICATION & TESTING

Our mission is to create innovative products in baby products' industry and to help parents to grow their children.

We conduct regular product testing in our laboratories:

- Stroller dynamic, durability tester
- Testing platform for stroller stability
- Packaging testing machine
- UV aging enviromental test chamber
- Active Formax mannequins
- 3D printer
- Completed **ISO 9001** and **ISO 14001: 2015** certification

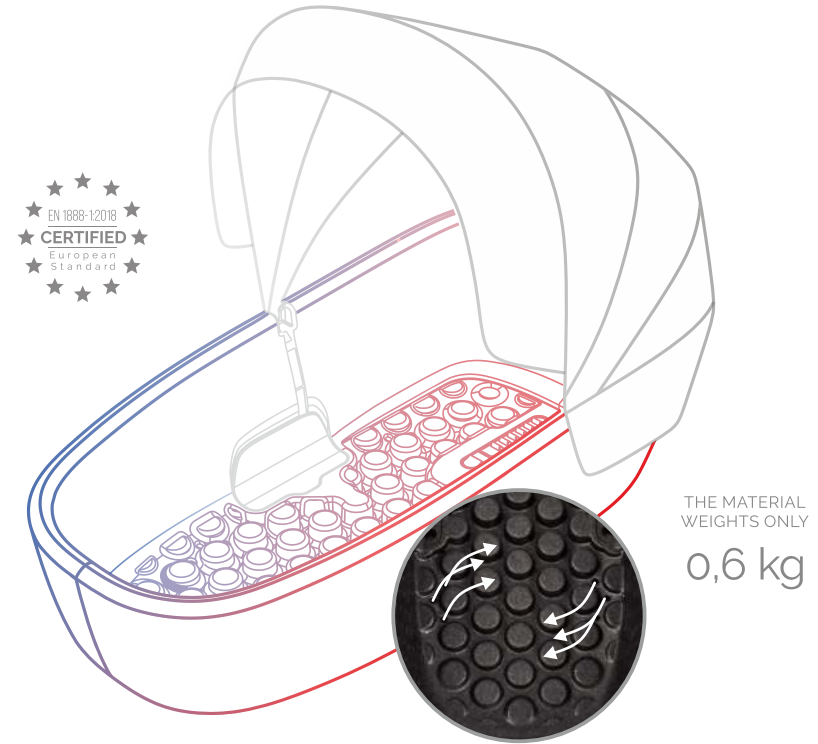

INNOVATIONS

Every day we keep researching, testing and innovating our products from our headquarters in Northern Europe. We heavily invest in cutting-edge product design, manufacturing processes and customer satisfaction that goes beyond just strolling.

We are proud to be the innovators of **Thermocot™** - next generation ultralight thermal carrycot, which has become so valued amongst our consumers.

THERMO⁺ COT

INNOVATIONS

THERMO⁺ COT⁻

We believe that a good stroller needs to accommodate baby's needs no matter the season or weather conditions. It is our priority to ensure that baby feels comfortable in the carrycot and is protected from wind, cold or heat. With this goal in mind, we have developed **ThermoCot™** technology, which regulates carrycot's microclimate and adapts to different weather conditions. For more than 3 years now, ThermoCot™ technology has been used in Tututis strollers and performs perfectly.

Specifics:

ThermoCot™ is an innovative combination of polyethylene materials that make the carrycot outstandingly light, durable and robust. Similar material is used in the construction of safety helmets.

The **ThermoCot™** carrycot is incredibly light: the first generation carrycot weighs just 0.9 kg while the 2nd generation carrycot weighs only 0.6 kg! With all the carrycot details, plastic reinforcements, and fabric trim, it can weigh 3.1 - 3.6 kg.

ThermoCot™ benefits from thermoregulatory features, unlike the standard plastic carrycot. Compared to the plastic carrycot, the thermal resistance of **ThermoCot™** carrycot is up to 111 times better and guarantees comfort for the baby in both: cold and hot weather. The temperature is balanced in all parts of the carrycot, the **ThermoCot™** reduces moisture settling, which prevents mold growth.

The combination of materials is very durable, yet elastic. Tututis engineering team has thoroughly tested this carrycot. The test results have demonstrated that the carrycot structure could withstand up to 104 kg weight and 24 kg weight hit from 0.5-meter height. These tests prove **ThermoCot™** to be the safest carrycot for the baby, providing not only micro-regulation, but also protection from external hazards.

ThermoCot™ technology is used in the following Tututis strollers: Aero Tutis, Viva life, Uno, Zippy, Zille, Noordi Fjordi, Noordi Luno.

INNOVATIONS

All-Road™ Technology wheels

Designed by our in-house engineering team, the new All-Road™ Technology wheels are perfect for conquering off-road and forest paths, while ensuring comfort for everyone involved.

The innovative shape with an embossed line significantly increases mobility, making it exceptionally easy to maneuver the stroller. The soft and durable material of the wheels was selected to ensure flawless performance in all seasons and all weather conditions.

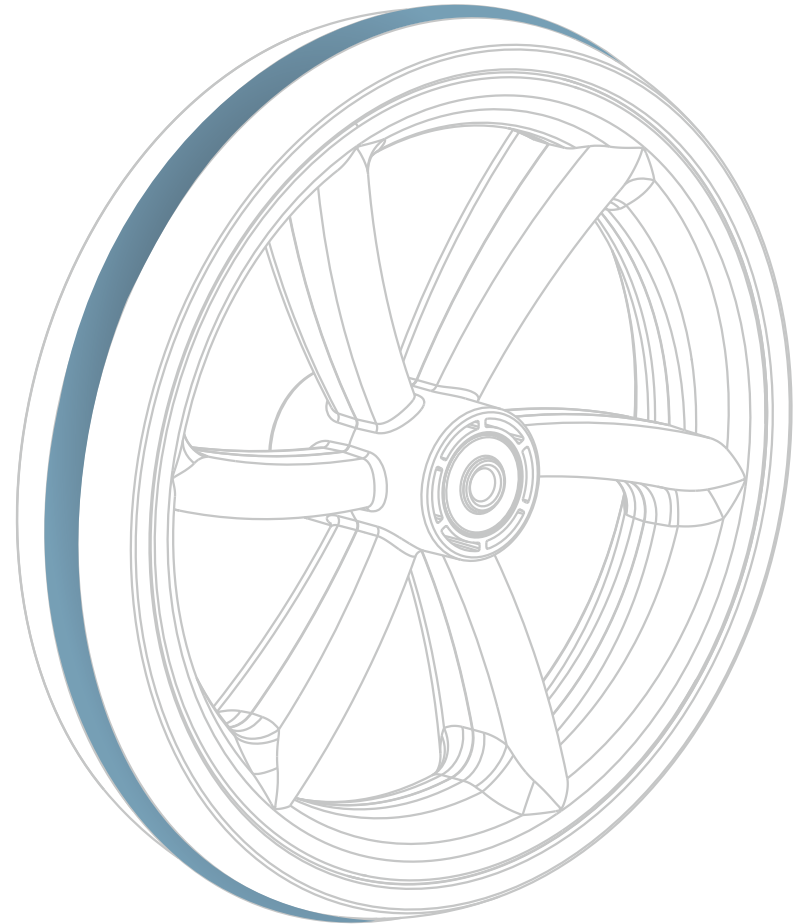

INNOVATIONS

All-Road™ Technology wheels

Key features:

- Made of top-notch nylon and enhanced with fiberglass, the wheels are significantly more resistant to scratches and deformation.
- The special texture of the tires makes them more durable.
- Self-lubricating POM bushings in the front make it easy to maneuver the wheels as well as protect them from corrosion.
- The custom PU tire technology with an embossed line distributes the weight to make strolling more agile and tender.
- Wide low-profile tires ensure easy passage regardless of the terrain.
- In contrast to regular tires, PU tires remain soft even at low temperatures.
- The rear bearings absorb around 70% of the total weight (stroller + child).

COLLABORATIONS

Having initial concept ideas, sketches or prototypes, Tututis team has demonstrated an ability to create production-ready samples.

The team of designers, engineers, developers, tailors, cutters, welders, mechanics and other specialists of the kind, work hand in hand in a solid headquarters to fulfill the visions of the clients.

Sporty bicycle trailer for Thor Hushovd

In November 2019, we started our collaboration with Thor Hushovd AS. Our initial proposal was to provide product development and assembly services for the sporty bicycle trailer. In collaboration with another Norwegian product development team 'Inventas', we have finished the development of the product and prepared it for production. After a successful initial launch, our development team continues to oversee the developing the 2nd version of Thor Hushovd Bike Trailer by implementing construction and textile improvements.

SUCCESSFUL COLLABORATIONS WITH:

HAKUSAN, Japan
BUBA, Bulgaria
BOJUNGLE, Belgium
SWEET BABY, Russia
DAY CARE 1, Netherland
DYMLA, Sweden
ANSTEL, Australia

Ever since TUTIS was started, we've been paying attention to details, keeping children in mind, moving only forward together with you, and developing the items what parents will need tomorrow.

TUTIS has been known for its quality and reliability for more than 15 years. TUTIS has never stopped pushing limits to find more solutions that allow parents experiencing life together with a baby by their side. We offer time-tested classical strollers, as well as strollers distinguished by their exclusive technological innovations and design solutions. The portfolio of TUTIS products contains more baby items, such as baby bedding, blankets and clothes for babies.

TUTIS strollers are made to adapt to the needs of any family and to turn daily life into an enjoyable journey, because **TOGETHER WE ARE HAPPY.**

uno³+

THE NORTHERN WAY

THE NORTHERN WAY

THE NORTHERN WAY

THE NORTHEN WAY

We come from the Nordic region, where great design is a way of life!
NOORDI strollers were created by taking into consideration every detail, optimal balance and comfort.
At Noordi, we want to contribute to a more sustainable world through innovative,
high-quality products manufactured responsibly.

Inspired by Nordic nature and based on Scandinavian design and quality,
we encourage parents to live actively and explore the outdoors with their babies.
Let's start this journey together and go for a stroll "The Northern Way".

AQUA

Get ready for effortless strolls even in the busiest streets. Aqua is designed for the flexibility you need around the city and nature, so you could enjoy parenting to the fullest.

Scandi design and ergonomic solutions in the Aqua are the one thing that sets it apart from other strollers. Ultralight and foldable carrycot, compact folding and durable chassis, smart amortisation system and adjustable lateral shock absorption system are only a few of many Aqua features that provide the comfort ready for any discovery. With Aqua your stroll will be as smooth as water flow.
